OUTDOOR USE

INDOOR USE

DILUTION
WITH WATER

APPLICATION
WITH A CLOTH

S-CLEAN

Sanitizing neutral liquid detergent suitable for cleaning furniture and coated surfaces for indoors. Creates an anti-static film that repels dust.

HYGIENICA

Hydroalcoholic sanitizer with 80% alcohol and a vervain scent for cleaning surfaces and objects.

GLASS CLEANER

Sanitizing liquid detergent for cleaning glass, plastic, mirrors, steel, and other shiny surfaces. It is an exceptionally powerful de-greaser and creates an anti-static film that repels dust.

PULIWOOD

Concentrated neutral sanitizing liquid detergent for coated wooden flooring. Prepare a 2% solution with water and apply using a well wrung-out cloth.

FAST CLEANER

Sanitizing neutral liquid detergent suitable for cleaning transparent and lacquered frames and shutters. It can also be applied to shutters, fences, balconies, doors, and other wooden items located outdoors.

THE GENTLE TOUCH THAT SANITIZES ALL SURFACES

SURFACE PREPARATION

Before using ICA for your products, surfaces are best cleaned beforehand with a neutral detergent and warm water; this prepares the surface and stops it from being abraded by excessive rubbing.

NOT ALL MATERIALS ARE THE SAME

Do you want to clean materials that are coated? Avoid solutions that contain alcohol.

SANITIZATION AND CARE

ICA for you sanitizing products all come with a handy vaporizer except for PULIWOOD for cleaning wooden flooring. Apply directly to the surface to be treated and rub gently dry with a soft cloth (preferably in microfiber) until the product has been completely absorbed.
